OBJECTIVE

A self motivated, responsible & hard working person. I enjoy challenges put forth to me & skillful at evaluation problems. My career objective is to promote an organization that ensures the development & growth of the individuals & organization at large. Able to work collaboratively with other team members to provide the best possible support to customers.

Projects :

https://imdbram.netlify.app/: This project provides an overview on everything that you need to build a ReactJS application . The express framework is used as the backend, and react as frontend. To keep concepts simple, the application is an imdb clone with basic movie recommendation functionality.

https://searchmovieram.netlify.app/ : Used ReactJs Hooks and API fetch.

https://apartment-tau.vercel.app/property : A real Estate app using React, NextJs, Rapid API, Google Map, Chakra UI to help users search and browse real estate properties.

https://rent-match-img.vercel.app : Bayut Clone.

User Login And Register: CRUD Application With MERN Stack. Frontend - React.js, Material-ui & Bootstrap 5, Backend - Node.js & Express.js Database – MongoDB, IDE used - Visual Studio Code.

WhatsApp clone: This app will allow users to create accounts, send and receive messages, create and join groups, and manage their profiles. Use technologies MERN stack, Socket.IO, JWT, Cloundinary, Chakra-UI.
