Respecte Sir,

I am a full stack developer with skills and knowledge to work on both the front-end and back-end parts of a web application. Proficient in multiple programming languages, frameworks, and technologies that are required to build a complete web application from start to finish.

With my excellent customer service skills and administration experience of around 15 years in the field of finance and banking domain with currently acquired web development skills, I am confident that I would be an asset to any organization.

I have some experience working with MERN (MongoDB, Express, React, NodeJS) stack technologies and I am proficient in HTML, CSS, JavaScript and related front end libraries. I have also worked with various backend technologies, including REST API's, relational databases, and server-side scripting languages. Apart from this, a strong understanding of Data Structures and algorithms knowledge, which help me to develop efficient solutions, write better quality and improve system performance.

My strong problem-solving skills, attention to detail, and ability to work well in a team make me a strong candidate for any open position. I am eager t learn new technologies and I am confident that my skills and experience will enable me to contribute to the success of any organization.

Thanking You,

Ram Sidh
